Theoretical electrical engineering and electrophysics

SCHERBA A.A, PODOLTSEV A.D., KUCHERJAVA I.N. Study of erosion failure of materials

at electric spark machining of current conducting pelletized
media _____ 3

GLUKHENKY A.I., GORISLAVETS Yu.M. Investigation of a system "inductor—massive turn-
electromagnet" by means of a computer for devices of liquid metal
metering _____ 11

Conversion of electric energy parameters

FEDIY V.S., NAMESTN1K S.G. Control performances of a three-phase valve-capacitor source

of reactive power (RPS) in a capacitive mode _____
_____ 19

DENISOV Yu.A., IVANETS S.A. About expediency of indistinct regulators connection into

the systems of voltage stabilization _____
_____ 23

LIPKOVSKY K.A., MOZHAROVSKY A.G. Executive structures of voltage regulators with two

electromagnetic elements _____
_____ 31

LUPENKO A.M. High-frequency electronic start-adjusting unit for discharge lamps supply

with, low-frequency rectangular current
pulces _____ 39

Electromechanical energy conversion

KUDIN V.F., TOROPOV A.V. Synthesis of a non-linear suboptimum controller of a servo drive with

a synchronous motor _____
_____ 45

ANTONOV A.E., LESNIK V.A., VELICHKO O.N. Influence of an external leakage field of

a three-stage electric motor on its operation _____
_____ 49

VAS'KOVSKY Yu.N., TSIVINSKY S.S., VETUSHKO S.A. Determination of inductive impedances

of synchronous machines on the basis of numerical computations of electromagnetic fields _____
_____ 52

ANTONENKO A.I., GALYNOVS'KY O.M. Windings of control machines of electric machine

valve frequency converters _____
_____ 57

Electric power systems and installations

SEGEDA M.S., ZHOVNIR Yu.M. Balancing properties of a plant of a dynamic load mode stabilization_____ 62

KONOPLEV K.G. Phase voltage change at sampled-data control of a synchronous generator in

autonomous electric systems_____ 68
