CONTENTS

Electrodynamics of electrical power devices

Reztsov V. E, Surzhik T. V., Shevchuk V. I. Stability of a system photobattery — constant current

motor — non-linear mechanical load _____
_____ 3

Emets Yu. P., Onanko A. F. Influence of external electromagnetic field on a cylindrical wire disposed

near the earth
surface _____ 7

Puchka V. A. Numerical investigation of electrostatic problem solution near non-regular points of

a
surface
_____ 12

Sikora R., Chady T., Komorovsky M., Zio Bcovsky M. Control of three-dimensional distribution of

magnetic field
_____ 14

Electric energy parameters conversion

Grechko E. N., Atroschenko V. A., Sin'kov A. G., Stepura Yu. P. Analysis of transient processes

in a convertive module of autonomous power supply systems on the basis of spectral-operating

method
_____ 18

Shidlovskaya N. A. Currents and voltages in circuits with non-ideal supply sources and non-linear

active load

24

Zayats V. M., SinitskyLA. About power dissipation of generator systems at transistors switching_____28

Electromechanical power conversion

Kislenko V.I., Onoprish V. P., Salan A. V., Pashkov N. I. Designing of four-pole asynchronous

motors of smallpower of fase type_____32

Kuchinsky K..A., Antoniuk S. M., Fink A. F. Investigation of heat processes in active zone of

massive rotors of non-pole motors of 800 — 4000 kW
power_____37

AntonenkoA. I. Generalized law of electromagnetic induction_____43

Shved P., Novakovsky R., Shymchak P. Utilization of heat losses of power transformers by

thermoccompressors_____47

Boyar-Sozonovich S. P., Shtepa E. P. Birotative electrical machines of alternating current in

generator and motive
regimes _____ 49

Malafeev S. I., Kiseleva N. O. Program complex for simulation and adjustment of regulators of

electromechanical
systems _____ 55

Verbovoi P. F. Problems of creation of controllable electric drive of alternating current _____

8

5

Electric energy systems and installations

Stogniy B. S., Selekman N. A., Tankevich E. N. Digital restoration of output signal of high-voltage

current
converters _____
_64

Kachanova N. A., Tverdyakoy V. V. Equivalenting in regime simulators at personnel computers for

operational personnel of power systems _____
_____ 68

Denisjuk V. P. Simulation of electrical load charts by trigonometric polynomials of Ermith _____
_____ 70

Borodulin M. Yu. Digital model for electromagnetic processes investigation in multistation power,

transmission of constant
current _____ 73

Scientific and technical information

Pazeev G. F. Source of secondary power supply _____ 80
