REVIEWER EVALUATION FORM**

Article Title

Authors

No	Question to the reviewer	Yes	No	Comment
1.	Does the topic of the article correspond to the scientific profile of the journal?			
2.	Is the topic of the article relevant?			
3.	Does the title reflect the content of the article?			
4.	Is the analysis of publications on the issue under consideration sufficient, and are the references to them correct?			
5.	Is the scientific argumentation of the main provisions of the article logical and convincing?			
6.	Are the main research results sufficiently substantiated? Do they contain elements of scientific novelty? If you believe amendments or clarifications are necessary, please provide your suggestions.			
7.	Do the conclusions presented fully reflect the results of the research?			
8.	Does the design meet the requirements?			
9.	Should some parts of the article be shortened, deleted, expanded or rewritten?			
10.	Will you recommend any clarifications regarding style, language, or terminology?			
Final Reviewer Recommendation				Recommended for publication
				Minor revision required
				Major revision required
				Not suitable for publication

If necessary, the comment can be expanded.
